DAMASCUS LANDFILL SITE
146 DAMASCUS ROAD, EAST QUOGUE
SITE INVESTIGATION UPDATE. – MARCH 6, 2023

The NYDEC approved, ongoing site investigation plan for the Damascus Landfill requires off site, down gradient, ground water testing. In order to meet this site investigation requirement, the engineering firm hired by the Town to complete the site investigation will be drilling six off site wells along Old Country Road (3 wells) and along Midhampton Road (1), Rady Lane (1) and Lewis Road (1) within the Town right of way. The test wells exact locations, once verified, will be identified on a map posted on this page. The water samples collected from these test wells will be sent for lab analysis and the results reported to the NYDEC as required. These test results along with other results from water samples collected on site also will be included in final report to the NYDEC for their review and evaluation.

This off site testing will commence on or about March 20, 2023 and continue through April
