Re: Monthly Progress Report for Feb. 10, 2022 to Mar. 10, 2023
Former Damascus Landfill
East Quogue, New York
NYSDEC BCP Site #C152253

Dear Ms. Sweet,

The Town of Southampton is pleased to submit this progress report to the NYSDEC regarding the investigative activities at the Former Damascus Road Landfill.

Since the previous Progress Report was prepared for the above-referenced site, additional activities that have been completed include the following:

- A letter report was drafted summarizing the PFAS soil data from the 14 on-site soil borings completed in December 2022 under the first part of Phase 4 of the RI. The report was submitted to the NYSDEC on February 16, 2023, and included recommendations for advancing onto the second part of Phase 4 which includes collecting additional soil samples from the on-site boring locations for full TAL/TCL analysis in addition to collecting soil samples for PFAS analysis after completing the SPLP extraction procedure. It was also recommended that the RI be advanced to Phase 5 which includes the completion of six vertical profile borings at off-site locations.
- Scheduling for the completion of the second part of Phase 4 and Phase 5 of the RI was performed.

In the following month, we plan to perform the following:

- The Town will complete the additional on-site soil sampling as recommended in the February 16, 2023 letter.
- In addition, the Town will advance to Phase 5 of the RI which includes the completion of six off-site vertical profile borings (OSPB-1 through OSPB-6) where additional groundwater samples will be collected for PFAS analysis.

Please feel free to contact me at 631 283 6055 x 1865 if you have any questions.

Respectfully,

A handwritten signature in black ink that reads "Francis Zappone". The signature is written in a cursive style with a large initial 'F'.

Francis Zappone
Deputy Supervisor
