

PROJECT APPLICANT:	North Haven Manor Association
PROJECT TITLE:	Cedar Ave & Bay View Dr N Stormwater Improvement
PROJECT TYPE:	Non-Point Source Abatement
SCALE:	Neighborhood/Watershed
APPROACH:	Remediation

DESCRIPTION:

The proposed project requests funding to aid in the planning and design of stormwater runoff improvement system at the intersection of Cedar Avenue and Bay View Drive North in North Haven Manor. The improvement will include a bioretention facility, new storm drain, and deep leaching pools. The goal of this project is to correct a problematic ponding and runoff situation in this area and prevent the stormwater runoff from entering Sag Harbor Bay.

During Phase I of this project, the North Haven Manor Association (NHMA) contracted with the Raynor Group to analyze the roadways and stormwater runoff patterns along Cedar Avenue and Bay View Drive North to propose a plan to correct the runoff and pooling issue. The NHMA is requesting funding to aid in the implementation of Phase II of their project. Phase II includes the grading and installation of the bioretention facility as well as the installation of the drainage structures in the problematic area. Work will be supervised by the Raynor Group and construction will be bid out to and conducted by a reputable company.

REQUESTED AMOUNT: \$53,145.00
